

PCI 2 Axis Analog Encoder Servo Card Firmware v13.2 Release Note

Cat. No. 1784-PM02AE

Introduction

This release note corresponds to version 13.2 of the PCI 2 Axis Analog Encoder Servo Card. It is intended for use in the SoftLogix™ system as follows:

Update this software or firmware	Catalog Number:	Revision
RSLogix 5000™ Software	9324-RLD300ENE	13
	9324-RLD600ENE	
	9324-RLD700NXENE	
SoftLogix 5800™ Software	1789-L30	13
	1789-L60	

This is a minor revision to the firmware and contains the following corrections and restrictions.

Corrections

Corrected the anomaly introduced in version 12.9 that prevented a Motion Servo On (MSO) instruction from physically operating when executed after a Motion Direct Drive On (MDO) instruction.

Restrictions

- A ControlFLASH™ operation should not be attempted while a SoftLogix engine containing a motion program resides in the virtual chassis.
- The system should be rebooted after a ControlFLASH operation, especially if multiple cards are tied together via a Synchronization Cable (catalog number 1784-PMCSY4).

RSLogix5000, SoftLogix5800, SoftLogix, and ControlFLASH are trademarks of Rockwell Automation.
